

Main Feature

- The machine is designed in accordance with international MDB standards, complying with DEX standards also. With above, machines are compatible with different international universal peripherals.
- Payment system approved on machines includes WeChat Pay, Ali Pay, JD Pay and BestPay
- The machine can sell large varieties of commodities, such as different snacks, cool drinks in can/bottle/box/soft bags, etc.
- The machine features a large glass window with narrow borders and LED lights that make the machine looks deluxe and enable a direct view of all the commodities inside.
- 5 inch high-definition color screen, 16-key metal key delivery operation more concise and convenient.
- Machines apply the polyurethane(PU) foaming system with refrigeration. Other technologies include: 360° all-rounded foaming, high efficiency warming isolation system, imported embraco compressor and R134a refrigerant(matching the national environmental protection requirements). The interior temperature shows on the digital display and it can be adjusted as per customers' request.
- Machines are equipped with the electrical demisting system, i.e., the temperature of the glass goes up to prevent the glass from condensation and to demist quickly via the increasing of power.
- Protection system on power leaking ensures the safely running of TCN's machines, as well as the anti-explosion, dustproof, waterproof and luminous metal keypad.
- The infrared drop sensor is equipped to guarantee the precise dispensing and money will be returned if dispensing failed.
- Microcomputer system in the machine enables intelligent data checking, statistics, calculating, self-diagnosis, etc.
- Multi-functional cloud service system is TCN's another big advantage, with which you can check the sales data and machine status whenever the internet is available.

Technique Data

Type: 36-48 Kinds (As per the size of commodities)
 Capacity: Approximately 288 Items
 Temperature: 4C° --25C° adjustable)
 Dimension: 1940X790X726.5MM
 Weight: 190KG
 Electricity: AC100-240V, 50/60HZ
