

## Main Feature

- The machine is designed in accordance with international MDB standards and it is in compliance with DEX standards also, it can work with different international universal peripherals.
- The machine can work with WeChat pay, Ali pay, JD wallet and BestPay, it can also accept banknotes and coins and can give change in coins.
- The machine has a microcomputer system that enables intelligent data inquiries, statistics, settlements, self-diagnosis, etc.
- We have a multi-functional cloud service system with which you can inquire the sales and the status of each machine at any time by connecting to the internet.
- Fluoride free refrigerating system with individual modules easy for repair and maintenance.
- The machine has a power failure protection system
- The machine is equipped with an infrared drop sensor as part of the standard configuration to guarantee precise dispensing, the machine will refund if it fails in dispensing.
- The machine is equipped with a surround stereo refrigerating system that guarantees fast and even refrigeration to keep the ice cream fresh. The thick insulation layer makes the machine more energy-saving.
- The machine can work under an exterior temperature of 40℃ and the interior temperature can be down to -18℃, the refrigerating temperature is 5℃ and the freezing temperature is -18℃, the temperatures are adjustable.
- The machine can sell ice cream, meat, fresh food, etc.

## Optional Function

- It is easy and convenient to embed self-service programmes and payment programmes in the machine's software system.
  - The machine can work with customized payment methods include but not limited to UnionPay, credit card payment, ApplePay, SamsungPay, NFC mobile payment, POS terminals, IC/ID card payment, QR pay, customized App, Mall shopping, etc.. The machine works with RS232 connections. Bill changer and pre-paid cards are also available.
  - Different kinds of trays are available including "Spiral tray", "Conveyor tray", "Large capacity tray" which makes it convenient to sell different commodities with the machine.
  - Customers can set the temperature of each tray according to his demands.
  - The machine is equipped with a heating system.
- Above model can be customized based on customers' demands.

## Technique Data

Commodity types: 12 kinds.  
 Capacity: 150~300 items.  
 -18℃ for freezing to 5℃ for refrigerating  
 Dimension (1949mm(H) \* 967.5mm(D) \* 1027mm(W).  
 Weight: 340kgs.  
 Power source: AC100~240V, 50/60Hz.
