

## Main Feature

- The machine holds the commodities in the way bullets do so that the bottles are very close to each other, which makes the capacity 10%~15% larger than snake machines at same volume.
- The machine can sell bottled drinks in different shapes, round, square or irregular without much adjustment in the slots, which gives the machine a great advantage over those ordinary ones.
- Push the bottles in one by one when stocking the slots just like reloading bullets, the resistance is low and it makes you feel good. You can push several bottles into the slot once, in this way you will be more efficient and do not need to worry about the safety of the bottles and the slot.
- When dispensing, the error rate of the slots in this machine can be kept under one out of thirty thousand, which is absolutely a leading figure in this industry in China, thus the machine is much more precise when dispensing.
- The machine can monitor the dispensing status of each slot inside, which helps the operators to get the real time status of the machine more quickly and precisely.
- The bullet slot design brings down the cost in materials and replacements and determines its easy and convenient maintenance, the ordinary employees will know how to do the job without special training.
- The consumers can see the 50 different merchandises inside dazzling when lighted, they buy what they see and their strong desire to buy will be aroused.
- The 7-inch touch screen works as a multi-functional human-machine interactive interface which enables humanized interactions by DIY images, cartoon and videos.
- The machine can work with WeChat pay, Ali pay, JD wallet and BestPay, it can also accept banknotes and coins and can give change in coins.
- We have a multi-functional cloud service system with which you can inquire the sales and the status of each machine at any time by connecting to the internet.
- Connections can be left out on the machine to make it a huge-capacity automatic vending machine.

## Technique Data

Model: TCN-MXY(7SP) bullet slot machine.  
 Screen : 7-inch touch LCD screen.  
 Dimension: 1940mm\*1313mm\*851mm  
 Slots: Standard 5 trays with 9 slots on each tray, the height between is 260mm  
 Capacity: 400 canned/bottled drinks.  
 Interior temperature: 4~25 degrees Celsius, adjustable.  
 Power source: AC100~240V; 50/60Hz.  
 Net weight: 300kgs  
 Payment methods: Wechat/Ali Pay, bill acceptor and coin changer are also available.  
 Imported compressor.  
 Commodities: Bottled or canned drinks, not including glass bottles.  
 Dispensing: The elevator can move on X or Y axis to reach the slot where the drink will be dispensed and then transfer the drink to the revolving door on the right.
